STEEL FABRICATION & ENGINEERING SOLUTIONS

Al Shenaya New Industrial Area
Ajman, United Arab Emirates

Excellence in Steel Fabrication Since 2007

SUN EMIRATES
— Mechanical Works L.L.C. —

INTRODUCTION

Sun Emirates Mechanical Works L.L.C. is a leading steel fabrication company established in **2007** in Al Shenaya New Industrial Area, Ajman, United Arab Emirates.

With over **19+** years of company operations and **24+** years of industry experience, we specialize in delivering high-quality stainless steel and mild steel fabrication solutions across multiple sectors.

We serve industries including **construction, interior decoration, marine, power, and oil & gas**, providing reliable and precision-engineered solutions.

Driven by excellence, we are committed to **quality, safety, and timely project delivery**, ensuring complete client satisfaction.

GROUP DIVISIONS

STEEL FABRICATION

Custom steel fabrication for structural, architectural, and industrial applications with precision engineering.

STRUCTURAL WORKS

Complete structural steel solutions including beams, columns, trusses, and complex metal structures.

PIPE FABRICATION

Professional pipe fabrication and piping systems for oil, gas, water, and industrial applications.

WELDING WORKS

Certified welding services including MIG, TIG, ARC, and submerged arc welding for various metals.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES
Mechanical Works LLC

COMPANY PROFILE

Sun Emirates Mechanical Works LLC has built a strong reputation as a trusted name in steel fabrication across the UAE.

Our experienced team of engineers, technicians, and skilled workforce is dedicated to delivering high-quality fabrication solutions that meet client specifications and industry standards.

We specialize in **stainless steel** and **mild steel** fabrication for a wide range of applications including construction, interior works, marine, power, and oil & gas sectors.

With a strong focus on precision, safety, and efficiency, we ensure every project is executed with the highest standards of quality and professionalism.

Our commitment to timely delivery and long-term client relationships has positioned us as a reliable partner for complex fabrication projects across the region.

KEY HIGHLIGHTS

24+ years
Industry Experience

Established
in 2007

19+ years
of Successful Operations

Multi-Sector
Project Expertise

Strong Focus
on Quality & Execution

OUR VISION

To be a trusted leader in steel fabrication across the UAE and beyond, recognized for engineering excellence, reliability, and long-term client partnerships.

OUR MISSION

To deliver high-quality fabrication solutions through skilled workmanship, advanced processes, and a strong commitment to safety, precision, and timely project execution.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES

Mechanical Works L.L.C.

Our Services

We provide end-to-end steel fabrication solutions tailored to meet diverse industrial and commercial requirements.

Structural Steel Fabrication

Custom fabrication of structural components for buildings, warehouses, and industrial projects with high precision and durability.

Stainless Steel Works

Premium stainless steel fabrication for architectural, decorative, and functional applications.

Custom Metal Fabrication

Tailor-made fabrication solutions based on project-specific requirements and technical drawings.

Machining & Equipment Works

Advanced machining and workshop capabilities to support complex fabrication needs.

Industrial Fabrication (Oil & Gas / Marine / Power)

Specialized fabrication services designed to meet industry-specific standards and performance requirements.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES

Mechanical Works L.L.C.

ENGINEERING CAPABILITIES

Sun Emirates Mechanical Works combines technical expertise with modern manufacturing capabilities to deliver comprehensive engineering solutions. Our team of experienced engineers and technicians ensures every project meets the highest standards of quality and precision.

FABRICATION CAPABILITIES

- Structural Steel Fabrication
- Stainless Steel Fabrication
- Mild Steel Fabrication
- Pipe Fabrication & Piping Systems
- Custom Metal Works

PROCESSING CAPABILITIES

- Welding (MIG, TIG, ARC, SAW)
- Surface Treatment & Coating
- Precision Machining
- Installation & Erection
- Quality Inspection & Testing

ENGINEERING SUPPORT

Our engineering team provides design assistance, material selection guidance, and technical consultation to ensure optimal solutions for every project. We work closely with clients from concept through completion, providing the expertise needed to achieve project objectives.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES

Mechanical Works L.L.C.

PRODUCTS

Sun Emirates manufactures a wide range of stainless steel and mild steel products for construction, industrial, and decorative applications. Our products are fabricated to exact specifications with attention to quality, finish, and functionality.

STAINLESS STEEL PRODUCTS

- SS Hand Rails
- SS Column Cladding
- SS Reception Counters
- SS Foot Rails
- SS Special Parts
- SS Skirting
- SS Cabinets
- SS Tables
- SS Handles

MILD STEEL PRODUCTS

- Steel Grating
- Mezzanine Steel Floor
- Storage Tanks
- Pipe Supports
- Roof Sheet Purlins
- Industrial Sheds
- Platform Structures
- Sign Board Structures

Excellence in Steel Fabrication Since 2007

SUN EMIRATES
Mechanical Works L.L.C.

FACILITIES

Our state-of-the-art facility is designed to handle diverse fabrication requirements with efficiency, precision, and scalability.

- Total Facility Area: **16,000+ sq.ft.**
- Fully Equipped Fabrication Workshop (Open & Covered Areas)
- Dedicated Stainless Steel & Mild Steel Fabrication Bays
- Structural Steel, Cladding & Custom Fabrication Sections
- Advanced Welding, Cutting & Finishing Equipment
- Material Handling, Storage & Dispatch Zone
- Integrated Quality Control & Inspection Area

HEALTH SAFETY ENVIRONMENT

- Comprehensive Occupational Health & Safety Programs
- Strict Environmental Protection Practices
- Continuous Employee Safety Training & Awareness
- Compliance with Industry Safety Standards and Regulations

Excellence in Steel Fabrication Since 2007

MANAGING DIRECTOR

Mr. Saminathan Subramani

Mr. Saminathan Subramani is the Founder and Managing Director of Sun Emirates Mechanical Works, established in **2007** in the UAE.

With over **24 years** of industry experience, he brings strong expertise in steel fabrication and mechanical contracting. Under his leadership, the company has completed **19 years** of successful operations, delivering high-quality fabrication solutions across the UAE and Gulf region.

He has played a key role in maintaining high standards of quality, safety, and timely project execution, building long-term client relationships and a strong industry reputation.

KEY HIGHLIGHTS

- **24+ years** industry experience
- **Founder** since **2007**
- **19+ years** company operations
- **Multi-sector** project expertise
- **Focus on quality** & execution

Year of Establishment: **2007**

QUALITY MANAGEMENT SYSTEM

We follow a robust **Quality Management System** that ensures consistent quality in all fabrication processes and deliverables. Our system covers every stage of our operations, from design and procurement to fabrication, inspection, and final delivery, ensuring efficiency, reliability, and customer satisfaction.

QMS CERTIFIED

SAFETY STANDARDS

- Adherence to OSHA and local safety regulations,
- Regular safety audits, training programs, and hazard assessments ensure a safe working environment for our employees and visitors.
- Safety is integrated into every aspect of our operations.

OUR VALUES

- **Quality First** - We ensure consistent excellence in every project
- **Safety Always** - Strict adherence to safety regulations.
- **Excellence** - Precision engineering in all our work.
- **Satisfaction** - Building lasting partnerships
- **Improvement** - Always evolving and improving

Excellence in **Steel Fabrication Since 2007**

SUN EMIRATES

Mechanical Works L.L.C.

STEEL FABRICATION

Our Steel Fabrication Division is the cornerstone of Sun Emirates Mechanical Works. We provide comprehensive steel fabrication services that cater to diverse industrial and commercial needs across the UAE and Gulf region.

OUR CAPABILITIES

- Custom steel fabrication for structural, architectural, and industrial applications.
- Precision engineering with advanced CNC machinery and equipment
- Fabrication of complex steel structures, frames, and support systems
- Sheet and plate shearing, bending, and rolling services
- Quality-controlled production processes ensuring consistent excellence.

INDUSTRIES SERVED

Our steel fabrication services support construction projects, industrial facilities, oil & gas installations, power plants, marine applications, and interior decoration projects throughout the region.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES

Mechanical Works

STRUCTURAL WORKS

The Structural Works Division at Sun Emirates specializes in designing, fabricating, and installing complete structural steel solutions. From initial concept to final installation, we deliver robust structural systems that meet the most demanding engineering requirements.

STRUCTURAL SOLUTIONS

- Structural steel beams and columns for buildings and industrial facilities
- Trusses and roof structures for warehouses, factories, and commercial buildings
- Mezzanine floors and platform structures for space optimization
- Staircases, ladders, and access structures
- Industrial sheds and storage facilities
- Pipe supports and equipment platforms

QUALITY ASSURANCE

All structural works undergo rigorous quality control processes, including material certification, weld inspection, dimensional verification, and load testing where required. Our structural fabrications comply with international standards and local building codes.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES

Mechanical Works L.L.C.

PIPE FABRICATION

Our Pipe Fabrication Division delivers professional piping solutions for critical applications in oil & gas, petrochemical, power generation, water treatment, and industrial processes. We fabricate piping systems that meet the highest industry standards for safety and reliability.

PIPING SERVICES

- Process piping for oil, gas, and petrochemical applications
- Utility piping systems for water, steam, and air
- Pipe spool fabrication and pre-fabrication services
- Bending of pipes to precise specifications
- Flange and fitting installation
- Hydrostatic testing and quality verification

MATERIALS & STANDARDS

We work with carbon steel, stainless steel, and alloy materials, following ASME, API, and ANSI standards. Our certified welders ensure every joint meets the required specifications for pressure rating and service conditions.

Excellence in Steel Fabrication Since 2007

SUN EMIRATES
Mechanical Works L.L.C.

WELDING DIVISION

Our Welding Division provides certified welding services performed by skilled and qualified welders. We use a variety of welding processes to meet different material and application requirements, ensuring strong, durable, and code-compliant welds.

WELDING SERVICES

- Structural Steel Welding & Fabrication
- Piping Welding (CS, SS & Alloy)
- Pressure Vessel & Skid Welding
- Field & Workshop Welding Services
- Repair, Rebuild & Maintenance Welding
- WPS, PQR & Welder Qualification
- Inspection & Quality Verification

WELDING PROCESSES

PROCESS	DESCRIPTION
SMAW (Stick Welding)	Versatile process using flux-coated electrodes, ideal for field and repair work.
GTAW (TIG Welding)	Precision welding for thin materials and stainless steel applications.
GMAW (MIG Welding)	High-speed process suitable for production and general fabrication.
FCAW (Flux Core Arc Welding)	Efficient for thick materials and outdoor or challenging conditions.
SAW (Submerged Arc Welding)	Automatic process for heavy plates and long, continuous welds.

QUALITY & CERTIFICATIONS

Our welders are certified to AWS (American Welding Society) and ASME standards. We maintain Welding Procedure Specifications (WPS) and Procedure Qualification Records (PQR) to ensure every weld meets the required codes and customer specifications.

SURFACE TREATMENT

Our Surface Treatment Division provides comprehensive finishing services to protect and enhance fabricated steel products. Proper surface preparation and coating application are essential for durability, appearance, and corrosion resistance.

SURFACE PREPARATION

- Sand Blasting for thorough surface cleaning and profiling
- Shot Blasting for scale removal and surface preparation
- Chemical Cleaning and Degreasing
- Manual Grinding and Surface Conditioning

COATING SERVICES

- Protective Paint Systems for Industrial Applications
- Epoxy Coatings for Chemical Resistance
- Zinc-Rich Primers for Corrosion Protection
- Powder Coating for Durable Decorative Finishes
- High-Temperature Coatings for Special Applications

QUALITY STANDARDS

All surface treatment processes follow industry standards including SSPC (Society for Protective Coatings) and NACE guidelines. We ensure proper surface profile, coating thickness, and adhesion for lasting protection.

SSPC

NACE INTERNATIONAL

MACHINE SHOP

Our **Machine Shop** provides precision machining capabilities to support fabrication projects and deliver finished components to exact specifications. We combine modern equipment with skilled machinists to achieve tight tolerances and quality finishes.

MACHINING CAPABILITIES

- CNC and conventional machining
- Drilling, tapping, and threading operations
- Milling and turning services
- Cutting of plates and structural sections
- Custom component manufacturing

EQUIPMENT

Our machine shop is equipped with lathes, milling machines, drilling machines, hydraulic presses, and plate rolling machines. This equipment enables us to handle a wide range of machining requirements in-house, ensuring quality control and timely delivery.

SUN EMIRATES

Mechanical Works L.L.C.

INDUSTRIES WE SERVE

Sun Emirates Mechanical Works serves a diverse range of industries, providing specialized steel fabrication solutions tailored to the unique requirements of each sector.

CONSTRUCTION

Fabrication of structural steel, architectural metalwork, and building components such as commercial, residential, and industrial projects.

INTERIOR DECORATION

Fabrication of stainless steel fixtures, decorative panels, handrails, custom made components and high-quality metal works for sophisticated interior spaces in commercial and high-end buildings.

MARINE

Marine-grade steel fabrication for ships, offshore platforms, and port components, including hulls, decks, piping systems, and heavy-duty steel equipment for the maritime industry.

POWER

Fabrication of steel structures, pipe racks, supports, and equipment platforms for power plants, including boilers, turbines, tanks, and auxiliary systems.

OIL & GAS

Specialized fabrication of piping systems, pressure vessels, storage tanks, heat exchangers, and structural components used in the extraction, processing, and transportation of oil and gas.

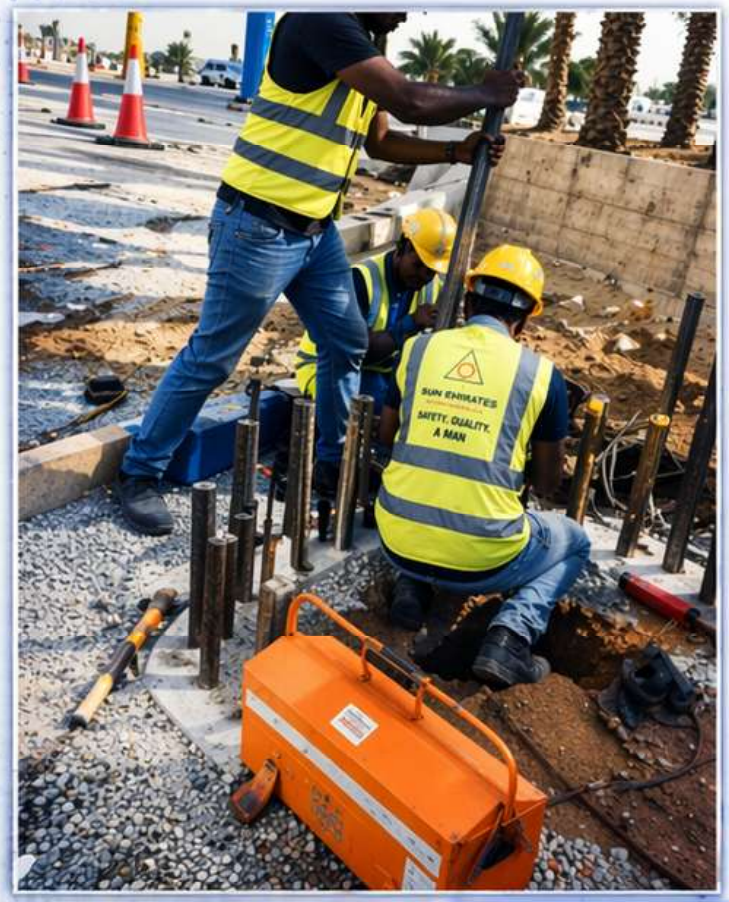

ENGINEERING

Custom steel fabrication of structural components and metal works for engineering projects such as railway infrastructure, bridges, specialized industrial equipment, and more.
